EXPERIENCE

Project Manager | Creatibuzz LLC

Hybrid

10/2024 - Present

- Managed end-to-end project lifecycle for UI/UX, frontend, and backend development projects using Agile and Scrum methodologies.
- Executed lead generation, technical bidding, and client acquisition through Upwork and Fiverr, contributing to revenue growth.
- Conducted requirement gathering, stakeholder meetings, and product discovery sessions, translating business needs into PRDs and technical documentation.
- Led cross-functional teams (Design, Frontend, Backend) to ensure sprint planning, milestone tracking, risk mitigation, and on-time delivery.
- Monitored project KPIs, ensured scope management, and maintained high client retention rates.

Technical Project Coordinator | Akij iBOS

Hybrid

09/2024 - 02/2026

- Directed end-to-end project management for ERP and digital software from initial discovery to final delivery.
- Conducted comprehensive market research and competitor analysis to define product requirements and technical feasibility.
- Executed strategic technical bidding and client acquisition on Upwork and Fiverr to drive revenue growth.
- Audited user-centric design layouts and frontend features to ensure alignment with stakeholder business goals.
- Bridged communication between international clients and engineering teams to translate complex needs into actionable documentation.

Technical Content Writer | Fileion

Remote

12/2024 - 02/2025

- Created technical documentation including user guides, FAQs, and knowledge-base articles.
- Collaborated with developers and designers to translate complex features into clear content.
- Edited and maintained documentation using Google Docs and MS Word.
